

FMT-45 Groundwater Filters

medium turbidity

FMT-45

ATTACHES EASILY TO A VARIETY OF PUMPS AND TUBING SIZES

The NEW medium turbidity **Watterra FMT-45** has all of the great features of the Watterra FHT-45, but with a reduced surface area at 300 square centimeters. These filters provide an economical alternative for lower turbidity sampling, when the highest possible capacity is not required.

NOW PRE-RINSED RINSES CLEAN!

All Watterra Inline Disposable Filters are pre-rinsed with one litre of de-ionized water to ensure purity, and are now certified to rinse clean. Independent ICP/MS analysis proves it.

CERTIFICATION

This certifies that Watterra FHT-45 inline filters now with PES media exhibit the following average rinse analysis when their effluent is tested using ICP/MS method. All analysis is performed by Maxxam Analytics Inc., 6740 Campobello Road, Mississauga, Ontario L5N2L8.

Element	ICP/MS ug/L	Element	ICP/MS ug/L
Ag	<0.1	Mo	<1
Al	<5	Na	<100
